### DISEASED ASH TREES

Emerald ash borer infestations are widespread throughout the city. Ash trees have pinnately compound leaves (green ash pictured courtesy nature.mdc.mo.gov). It is better to decide early whether to treat or remove any ash trees on your property; doing nothing will only increase eventual cost of removal and potential for damage to property. Obvious signs of infestation only appear after the tree is too compromised to save. For more information, please see city website at: [veronawi.gov/218](http://veronawi.gov/218)

**PLEASE CONTINUE ON REVERSE**
